

Global Drone solutions

On the 22 of November, 10 yr 9 students from NarroginSHS, and Boddington District High school got to participate in the wonderful opportunity given to us by James and Sarah. We learnt how to operate drones and learnt how drones impact the future and how it helps us now.

We had enjoyed ourselves even through the scorching weather but was worth it to gain the knowledge and the know-how. Everyone would love a lot more experiences just like this, we thank Miss Remi and Ms Sexton for making the day possible.
